We would like to thank you for your trust in ITI Mutual Fund.

We encourage you to connect with us on our digital platforms.

We request you to submit transactions / requests by using various other modes i.e. AMC website (www.itiamc.com) / RTA website <http://mfs.kfintech.com/mfs/> / RTA Mobile app / MFU website / MFU mobile application or connect with your financial advisor.

If you have any further queries, our phone line is available to assist you between 9:30 a.m. to 6 p.m. from Monday to Friday on 18002669603 (Toll free). Alternatively, you can also e-mail us at mfassist@itiorg.com. We would appreciate your patience while we work on your query and ready to provide satisfactory responses.

Thanking you, and assuring you of our best services always.

Glossary

- **Average Maturity:** Weighted average maturity of the securities in scheme.
- **Macaulay Duration (Duration):** Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero-coupon securities where they are the same.
- **Growth and Cumulative option:** Growth and Cumulative words are used alternatively.
- **Risk ratio data:** There are few stocks which are having abnormal price to earnings multiple, because of the aberration (Covid-19) in the financial results (of the base year). We believe the price to book multiple is a better indicator of the business valuation especially in this kind of abnormal situations. Investors should ideally normalise these valuation multiples to have a better idea of the portfolio.
These stocks were the price to earnings are abnormal high are:
 - Johnson Controls - Hitachi Air Conditioning India Limited
 - Jtek India Limited
 - The Phoenix Mills Limited
 - Aditya Birla Fashion and Retail Limited
 - ABB India Limited
- **Portfolio Turnover Ratio:** Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given period. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing it by average monthly net assets.
- **Tracking Error:** Tracking error indicates how closely the portfolio return is tracking the benchmark index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio is closely tracking benchmark index and higher tracking error indicates higher deviation of portfolio returns from benchmark index returns.
- **Risk Free Return:** The theoretical rate of return of an investment with safest (zero risk) investment in a country.
- **IDCW - IDCW** stands for 'Income Distribution cum Capital Withdrawal option'. The amounts can be distributed out of investors' capital (Equalization Reserve), which is part of the sale price that represents realized gains, as may be declared by the Trustees at its discretion from time to time (subject to the availability of distributable surplus as calculated in accordance with the Regulations).
- **Portfolio Yield (Yield To Maturity):** Weighted average yield of the securities in a scheme portfolio.
- **Total Expense Ratio (TER):** Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

How to read factsheet

- **Fund Manager:** An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.
- **Application Amount for Fresh Subscription:** This is the minimum investment amount for a new investor in a mutual fund scheme.
- **Minimum Additional Amount:** This is the minimum investment amount for an existing investor in a mutual fund scheme.
- **SIP:** SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for a SIP that invests Rs. 500 on every 15th of a month in an equity fund for a period of three years.
- **NAV:** The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which an investor enters or exits the mutual fund.
- **Benchmark:** A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds. Some typical benchmarks include the NIFTY, Sensex, BSE200, NSE500, Crisil Liquid Fund Index and 10-Year Gsec.
- **Entry Load:** A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged when an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101.
(Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor).
- **Exit Load:** Exit load is charged when an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceeds at net value of NAV less Exit Load. For instance, if the NAV is Rs. 100 and the exit load is 1%, the investor will receive Rs. 99.
- **Yield to Maturity (YTM):** The Yield to Maturity or the YTM is the rate of return when a bond is held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.
- **Modified Duration** Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.
- **Standard Deviation:** Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.
- **Sharpe Ratio:** The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
- **Beta Ratio (Portfolio Beta):** Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
- **AUM:** AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.
- **Holdings:** The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.
- **Nature of Scheme:** The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is termed an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.
- **Rating Profile:** Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Dear Investors & Partners,

The Nifty-50 reached the milestone of 20000 level in Sep'23 after a volatile and long journey from 18000-19000 levels. The index bounced back after declining in Aug'23. The index oscillated 967 points before closing 385 points (or 2% higher MoM (Month on month) at 19,638 level. The Nifty is up 8.5% in CY23YTD.

Conditions in US Markets (sticky inflation and higher yields) triggered selling by foreign institutions. FIIs were net sellers (Rs. 14,768 crores) while DIIs were net buyers (Rs. 20,313 crores).

- The large cap bellwether indices S&P BSE Sensex and Nifty 50 rose 1.5% and 2.0% respectively in September 2023. S&P BSE MidCap and S&P BSE SmallCap climbed 3.7% and 1.1% respectively.
- On the S&P BSE sectoral front, the leading performers were S&P PSU (10.6%), S&P BSE Power (7.1%) and S&P BSE Metal (6.1%).

September was an eventful month in terms of direct tax collections, GST collection figures and overall order inflows for the sector.

a. Direct tax collection: The Central Government's advance tax collections have recorded a remarkable 24 percent increase compared to the same period last year. This surge is a stark contrast to the modest 14 percent growth seen in the first quarter of this fiscal year, as reported by official sources. The 24 percent growth actually signifies a turning point in the government's fiscal outlook.

b. GST Collection: The month of September registered a 10% y-o-y growth in GST collection figure. GST collection crosses ₹1.60 lakh crore mark for the fourth time in FY 2023-24.

c. Opportunity canvass opening up for Indian companies: Larsen & Toubro which had a total order book of Rs. 4.12 lakh crore bagged a single order of Rs.32,000 crore from Aramco in the Middle East. This orders assumes significance in the wake of general global slowdown and the fact that the execution capabilities of the largest Indian infrastructure company getting recognised on a global landscape.

Apart from EPC contracts, Middle East is expected to open up a number of opportunities for Indian pipe manufacturers

This month also saw a recovery in monsoon compared to the precarious situation prevailed in the month of August 2023.

Monsoon update: Monsoon season ends with 'near-normal' rains (94.4% of Long Term Average (LTA)), which, along with the government policy measures including export curbs on essential food produce, should alleviate risks to food inflation. The situation has improved significantly in the month of September compared to the month of August 2023.

• Key pillars of the strength of the economy:

- Central and State Government capex touches new high on (Trailing 12 months) TTM basis

Source: CEIC, I-Sec research; Note: TTM represent capex data till Aug'23

- While the historical consumption trends have always registered a tilt in favour of value for money segment, a new trend is emerging now. The number of “High-Networth Individuals” is set to increase the consumption landscape in the country: As on date there are 50 lakh households in the country having earnings more than USD 35,000 per annum. This figure is expected to jump 5x to 2.5 crore households over the coming few years. The consumption pattern of these HNIs is expected to provide buoyancy in consumption pattern of various products/services. This change in the consumption trend is already being witnessed in various segments: The largest Passenger car manufacturer in the country is seeing a shift towards SUVs in the overall vehicle sales figure. Similar trend is being registered in case of alcoholic beverage companies where the consumption of P&A (Premium & Assorted Beverages) is on the rise.
- Valuations still in a decent zone:** The Nifty is trading at a 12-month forward P/E ratio of 18.6x. The P/B ratio is at 3.4x, just above the long term average. In terms of market-cap to GDP, the Indian markets quote at 110.9% which does not show sign of high-valuations.

Source: Bloomberg, I-Sec research

FY24 view remains intact:

For FY24, the short term may be impacted on account of the global geopolitical tension but we maintain our view that India's long-term growth story is intact. India's economy should continue to exhibit strength relative to other emerging markets, based on many macro indicators including strong Govt revenue collections, low corporate and bank leverage and stable external position. This should somewhat insulate India from a global economic slowdown.

Our Investment Framework – SQL

Based on our combined investment learnings of more than 50 years, we have institutionalized very strong investment Framework -SQL, which is core to our fund management framework and approach to our portfolios. We strongly believe that good quality (Q), low leverage companies (L) bought with a reasonable good margin of safety (S) makes the investment very attractive and rewarding for our investors.

Our Risk Management Framework

Our Risk Management Framework & our Investment Framework are well thought-out and institutionalised to generate superior investment performance and creating a smooth investment experience for all our investors. They are framed based on our own investment experience and also imbibed learnings from some of the great investment houses and investment managers globally, which will stand the test of time and keep our investors interest at high standards. We have put risk limits based on fund mandates, market cap segments, sectors and stocks.

Investment Framework	Equity	Fixed Income
S	Margin of Safety	Safety
Q	Quality of the Business	Quality of the Business
L	Low Leverage	Liquidity

How are we positioned in our funds?

With macro situation being very dynamic and volatility increasing across asset classes, we continue with our strategy of running well-diversified portfolios. We are more focused on stock selection process within the sector rather than trying to take large overweight / underweight position among sectors. The focus continues to be on stock selection on a bottom-up basis anchored on our “SQL Investment Framework”.

What should be your approach while investing into our Mutual Fund Schemes?

We expect the volatility to continue over the next few months as the market-outlook is likely to remain challenging. In the short term, the equity markets will be dependent on the newsflow of the geopolitical tension which has recently emerged.

Valuations remain marginally above long-term averages. On the back of lower commodity prices and with operating leverage, earnings would rise for corporates and rupee denominated trade could lead to a strong performance by the Indian economy.

Investors wanting to invest in lumpsum can invest in ITI Balanced Advantage Fund and ITI Long Term Equity Fund. Investment in equity funds, particularly mid and small cap categories, should be done systematically over the next three to four months in the form of daily / weekly STPs or SIPs.

Equity Market Outlook

- The Indian IT services sector continues to be its biggest strength globally. The sector continues to face turbulence due to global slowdown, delayed spending, which is reflected in revised estimates. On a positive note, there are signs of a turnaround in the sector's fortunes which is reflected in large deal wins which the IT companies have won over the last few weeks.
- Growth could see some challenges from slowdown in manufacturing as also tepid export demand. Even so the festive season over the next two months could prove decisive from point of view of consumer demand.
- The country's balance of payments could see some pressure with hardening of crude prices combined with rising interest rates in global markets.
- For cues, markets will look at the geopolitical scenario especially crude oil price, upcoming earnings season as also global macros like the Fed's stance and global interest rate outlook.
- Valuations are a mixed bag with certain pockets particularly in small caps and mid-caps appearing unsustainable. We could likely see a consolidation in segments which are quoting at expensive valuations. Investors can consider the SIP route in categories like large cap / flexi cap funds, which are more comfortably placed valuations-wise.

Debt Market Outlook

- The FOMC expectedly kept the benchmark rate unchanged in 5.25% – 5.50% target range in September 2023, with Governor Powell indicating that the FOMC was prepared to raise rates further if required. Furthermore, as a majority of the FOMC members estimating another rate increase this year, the Fed maintained the end 2023 Federal funds rate

projection at 5.6% and increased the end 2024 rate estimate to 5.1% from the earlier 4.6% - thus indicating a higher for longer policy rate expectation. Despite the considerable rate increases since early 2022, recent data from the US has been encouraging, and markets seem to be coming around to accept the possibility of the Fed's ability to engineer a soft landing for the US economy.

- Government bond (US Treasury) supply in the US remains significant, and nearly a third of the outstanding US treasuries are likely due for refinancing over the coming ~12 months. Thus, bond supply concerns, and a longer than earlier expected wait for rate cuts has led to higher global bond yields over the past month. Emerging market (EM) bond yields too are expected to bear the brunt of higher yields in advanced economies (AEs).
- The People's Bank of China (PBOC) followed up on its commitment towards a targeted and forceful monetary policy by cutting the forex reserve requirement ratio by 2% and reduced the Reserve Requirement Ratio (RRR) by 0.25%. This was the second RRR cut this year, with the latest reduction expected to release over 500B of yuan liquidity.
- The RBI expectedly kept the repo rate and the policy stance unchanged at the October 2023 MPC meeting, but the Central Bank's decision to consider open market operations (OMOs) in its toolkit via bond sales to actively manage liquidity was an unpleasant surprise to the bond markets. Based on the Central Bank's baseline projection estimate of Q4: 2024-25 inflation at 4.3%, we continue to anticipate the RBI to have a small window to cut the policy repo rate between the State and the Central elections due in November 2023 and April/May 2024 respectively. Additionally, we expect the policy repo rate to end 2024 around 5.75% - 6.0% range.
- Starting June 2024, Indian Government Bonds (GSecs) will be included in the JP Morgan GBI-EM index. This action has the potential to attract around USD25Bn of passive inflows into GSecs, and further attract additional flows from active asset managers. Thus, over the coming year, we expect bond yields to soften and outperform as compared to the past 2 years.
- We had largely maintained a low maturity as compared to peers for the better part of last month and had increased duration post confirmation of India's bond index inclusion. Geopolitics, crude oil prices, global and local bond yield movements are expected to drive the positioning of our duration portfolios. Local bonds are expected to trade in a wider range amidst higher volatility and thereby also offer opportunities across the yield curve. We prefer sovereign exposure over high grade credit.
- We feel that actively managed funds are a suitable alternative in the current environment and expect such products to deliver superior risk adjusted returns as compared to non-market linked fixed rate products.

Market Review

September 30, 2023

Equity Market Update

- Markets in September 2023 maintained a general uptrend. However, there were some profit bookings from higher levels across segments especially in midcaps and smallcaps. Conditions in US Markets (sticky inflation and higher yields) triggered selling by foreign institutions. FIIs were net sellers (Rs 14,768 crores) while DIIs were net buyers (Rs 20,313 crores).
- The large cap bellwether indices S&P BSE Sensex and Nifty 50 rose 1.5% and 2.0% respectively in September 2023. S&P BSE MidCap and S&P BSE SmallCap climbed 3.7% and 1.1% respectively.
- On the S&P BSE sectoral front, the leading performers were S&P PSU (10.6%), S&P BSE Power (7.1%) and S&P BSE Metal (6.1%).

Market Review

September 30, 2023

Debt Market Update

- India's retail inflation eased slightly to 6.83% in August, from the 15-month high of 7.44% in July 2023, but the rise in food prices remained sticky at around 10% with rural inflation at over 7%.
- India's wholesale prices remained in deflationary territory for the fifth month in succession in August 2023 with the decline in prices slowing to -0.52% from -1.36% in July 2023. Inflation in food and primary articles eased to nearly 6% vis-à-vis 7.5% in the previous month. The dip in deflation rate was triggered by hardening fuel and power prices from -12.8% in July 2023 to -6% in August 2023.
- India's factory output (IIP) surged to a five-month high of 5.7% in July 2023, (3.8% in June 2023), driven by strong growth in mining and power. Nine of the manufacturing sectors posted negative growth including electronics which is alarming given that it is part of the PLI (production linked incentive) arrangement. The approaching festive season spanning September, October, and November will serve as a litmus test for the sustainability of the industry's growth, contingent upon the resurgence of consumer goods demand.
- The gross GST revenue collections for August 2023 exceeded Rs 1.59 lakh

(1.65 lakh crore in July 2023). Year-on-year, GST collections were 11% higher vis-à-vis collections in the same month last year.

- India's merchandise trade deficit in August 2023 widened beyond estimates to USD24.2bn. India's merchandise exports stood at USD34.5bn, while imports were USD58.6bn in August 2023. Services exports in August 2023 were USD26.4bn vis-à-vis USD27.2bn in the previous month. Over the April-August 2023 period, services and merchandise exports fell nearly 5% YoY to USD306.3bn, while imports fell nearly 10% to USD343.8bn.
- The combined index of eight core industries expanded to a 14-month high of 12.1% in August 2023 vis-à-vis 8% in July 2023. The corresponding number was 4.2% a year ago. Growth in August 2023 was spurred primarily by an expansion in production of crude oil, natural gas, and coal, with products, steel, cement, and electricity also growing. The performance in August 2023 is the highest since June 2022, when it was 13.2%.
- India's fiscal deficit in 5 Month Financial Year 24 (5MFY24) stood at ~36% of FY24BE as compared to ~31.5% in the similar period last year. Gross tax revenue in 5MFY24 was 35% of FY2024E (17% higher than 5MFY23) and net tax revenue was 34% of FY2024BE (12% lower than 5MFY23), while expenditure in 5MFY24 was at 37% of FY2024BE.

Disclaimer - Fund SIP Performance

The performance details provided herein are of Growth option under Direct and Regular Plans. The Fund(s) offer Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of respective scheme. The returns are calculated by XIRR approach assuming investment of 10,000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with correct allowance for the time impact of the transactions.
