Market Update

April 30, 2025

Equity Market Update

- April 2025 saw markets posting a modest rebound, driven by appealing valuations and a reduced risk of tariff hikes. The BSE Sensex advanced by 3.65%, while the Nifty 50 posted a 3.46% gain. Similarly, mid and small-cap indices also moved higher, with the BSE Midcap rising 3.26% and the BSE Small cap increasing by 1.63%.
- Sectorally, the BSE CD (5.65%), BSE Oil & Gas (5.40%), BSE FMCG (5.17%) posted highest gains. BSE Metal (-5.76%), BSE IT (-2.97%), BSE Teck (-0.15%) suffered the highest losses.

Nifty 50 - P/E

Nifty 50 - P/B

Debt Market Update

- Retail inflation (CPI) cooled to a 67-month low of 3.34% in March 2025 (to 3.61% in February 2025), helped by softening food prices. This is the second month retail inflation stayed below the RBI's 4% target. For FY25, inflation averaged 4.6%, down from 5.4% in FY24.
- WPI (wholesale inflation) eased to 2.05% in March 2025, down from 2.38% in February 2025, amid lower food and fuel prices. Primary articles prices fell 1.07%, with notable drops in crude petroleum (-2.42%) and food articles (-0.72%). WPI Food Index dipped slightly (189.0 to 188.8); food inflation eased to 4.66%. Fuel and power inflation was 0.20% in March 2025. Manufacturing inflation rose to 3.07%.
- IIP growth moderated to 2.9% in February 2025, the weakest in six months, down from January's 5.0% high. Manufacturing output, the key driver, expanded by 2.9%, slowing from 5.5% a month earlier. Mining activity softened

to 1.6% growth, while electricity generation improved slightly to 3.6%. In manufacturing, basic metals (5.8%), motor vehicles and trailers (8.9%), and non-metallic mineral products (8.0%) were notable bright spots, buoyed by higher production of steel, cement, and auto components.

- India's core sector growth rebounded to 3.8% in March 2025, led by strong performance in cement, steel, and electricity, though still lower than the 6.3% seen a year ago. The three sectors offset declines in coal, fertilizer, and refinery output. The core sector's recovery contrasts with a broader industrial slowdown—February's IIP growth hit a six-month low at 2.9%, reflecting persistent weakness in manufacturing and mining.
- April GST collection hit a record Rs 2.37 lakh crore, up 12.6% YoY. The previous peak (Rs 2.10 lakh crore) was in April 2024; the March 2025 number was Rs 1.96 lakh crore.
- March 2025 saw India's exports inch up 0.7% to USD 41.97 bn, with imports surging 11.3% to USD 63.51 bn, pushing the trade deficit to USD 21.54 bn. In FY24, exports were flat at USD 437.42 bn, while imports rose 6.62% to USD 720.24 bn. Total goods and services exports grew 5.5% to USD 820.93 bn.

10-Yr Benchmark Gsec Bond

Past performance may or may not be sustained in future and is not a guarantee of any future returns, and should not be used as a basis of comparison with other investments. Index performance does not signify scheme performance Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Equity Market Outlook

- Despite muted expectations, valuations in several areas of the mid and small cap segments remain expensive. However, the recent correction has brought valuations into a more comfortable zone, which supports a positive long-term return outlook, particularly as current Nifty valuations hover near their long-term average. Geopolitical tensions, tariff negotiations, and broader global economic conditions will continue to play a critical role in influencing market sentiment. The market appears to be underestimating the potential positive impact of tax cuts on the consumer sector, as well as the Reserve Bank of India's recent policy pivot. Corporate earnings, especially from sectors like financials and consumer goods, will be crucial in shaping market dynamics in the coming quarters.
- In the medium term, select midcap and small cap companies with strong fundamentals could outperform. Prominent investment themes expected to do well include China+1 manufacturing, defence, power transmission and distribution, rural consumption, pharmaceuticals, and non-banking financial companies (NBFCs). Additionally, the stability of the Indian rupee could encourage foreign fund inflows, lending further support to the equity markets.
- In the near term, markets may be impacted by developments in the India–Pakistan relationship and changes in U.S. trade tariff policy. Furthermore, both domestic and foreign portfolio investment (FPI) flows will be key variables to monitor in May. Given the current global geopolitical backdrop, Indian equity markets are well-positioned to outperform.

Debt Market Outlook

- RBI lowered FY26 inflation forecast to 4% (from 4.2% earlier). According to its estimates, Q1 and Q2 FY26 inflation projections have been lowered to 3.6% and 3.9%, respectively.
- Further, the RBI has trimmed GDP growth forecast to 6.5% (from 6.7% previously).
- The RBI announced a Rs 1.25 lakh crore liquidity infusion, improving money supply and easing financial conditions. Stable inflation and strong macro fundamentals support bond yields.
- Geopolitical tensions could lead to short-term volatility in debt markets.

CDMDF : Corporate Debt Market Development Fund

Note:-

1. The risk ratios are calculated as per the AMFI methodology prescribed for these ratios.
2. The above table is a snapshot for quick understanding, it must be read with the Factsheet along with details of Riskometer for each scheme.
3. Please consult your financial advisor before investing. For details, please refer to respective page of the scheme.
4. Expense ratio includes GST, Base TER and additional expenses as per regulation 52 (6A) (b) and 52 (6A) (c) of SEBI (MF) regulations for both Direct and Regular plans
5. The TER for the above funds is in the range of 0.18% to 1.19% in the case of regular plans and in the range of 0.08% to 0.23% in the case of direct plans.

ITI Arbitrage Fund

(An open ended scheme investing in arbitrage opportunities)

April 2025

CATEGORY OF SCHEME: Arbitrage Fund

INVESTMENT OBJECTIVE

The investment objective of the Scheme is to generate income by predominantly investing in arbitrage opportunities in the cash and the derivative segments of the equity markets and the arbitrage opportunities available within the derivative segment and by investing the balance in debt and money market instruments. However, there is no assurance that the investment objective of the scheme will be realized.

For details of other Schemes managed by Fund Manager please refer to page no. 29 to 32.

Disclaimer - Fund SIP Performance

The performance details provided herein are of Growth option under Direct and Regular Plans. The Fund(s) offer Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of respective scheme. The returns are calculated by XIRR approach assuming investment of 10,000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with correct allowance for the time impact of the transactions.

We would like to thank you for your trust in ITI Mutual Fund.

We encourage you to connect with us on our digital platforms.

We request you to submit transactions / requests by using various other modes i.e. AMC website (www.itiamc.com) / RTA website <http://mfs.kfintech.com/mfs/> / RTA Mobile app / MFU website / MFU mobile application or connect with your financial advisor.

If you have any further queries, our phone line is available to assist you between 9:00 a.m. to 6 p.m. from Monday to Saturday on 18002669603 (Toll free). Alternatively, you can also e-mail us at mfasst@itiorg.com. We would appreciate your patience while we work on your query and ready to provide satisfactory responses.

Thanking you, and assuring you of our best services always.

Glossary

- **Average Maturity:** Weighted average maturity of the securities in scheme.
- **Macaulay Duration (Duration):** Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero-coupon securities where they are the same.
- **Growth and Cumulative option:** Growth and Cumulative words are used alternatively.
- **Risk ratio data:** There are few stocks which are having abnormal price to earnings multiple, because of the aberration (Covid-19) in the financial results (of the base year). We believe the price to book multiple is a better indicator of the business valuation especially in this kind of abnormal situations. Investors should ideally normalise these valuation multiples to have a better idea of the portfolio.
- **Portfolio Turnover Ratio:** Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given period. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing it by average monthly net assets.
- **Tracking Error:** Tracking error indicates how closely the portfolio return is tracking the benchmark index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio is closely tracking benchmark index and higher tracking error indicates higher deviation of portfolio returns from benchmark index returns.
- **Risk Free Return:** The theoretical rate of return of an investment with safest (zero risk) investment in a country.
- **IDCW - IDCW** stands for 'Income Distribution cum Capital Withdrawal option'. The amounts can be distributed out of investors' capital (Equalization Reserve), which is part of the sale price that represents realized gains, as may be declared by the Trustees at its discretion from time to time (subject to the availability of distributable surplus as calculated in accordance with the Regulations).
- **Portfolio Yield (Yield To Maturity):** Weighted average yield of the securities in a scheme portfolio.
- **Total Expense Ratio (TER):** Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

How to read factsheet

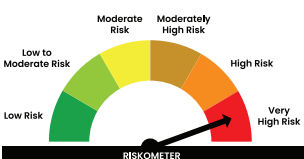

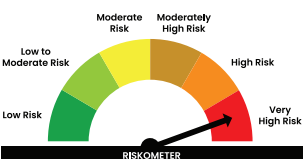

- **Fund Manager:** An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.
- **Application Amount for Fresh Subscription:** This is the minimum investment amount for a new investor in a mutual fund scheme.
- **Minimum Additional Amount:** This is the minimum investment amount for an existing investor in a mutual fund scheme.
- **SIP:** SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for a SIP that invests Rs. 500 on every 15th of a month in an equity fund for a period of three years.
- **NAV:** The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which an investor enters or exits the mutual fund.
- **Benchmark:** A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds. Some typical benchmarks include the NIFTY, Sensex, BSE200, NSE500, Crisil Liquid Fund Index and 10-Year Gsec.
- **Entry Load:** A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged when an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101.
(Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor).
- **Exit Load:** Exit load is charged when an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceeds at net value of NAV less Exit Load. For instance, if the NAV is Rs. 100 and the exit load is 1%, the investor will receive Rs. 99.
- **Yield to Maturity (YTM):** The Yield to Maturity or the YTM is the rate of return when a bond is held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.
- **Modified Duration** Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.
- **Standard Deviation:** Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.
- **Sharpe Ratio:** The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
- **Beta:** Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
- **AUM:** AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.
- **Holdings:** The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.
- **Nature of Scheme:** The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is termed an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.
- **Rating Profile:** Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Invest in India's Growing Consumption Appetite

ITI Bharat Consumption Fund

(An open ended equity scheme following consumption theme)

Product Labelling	Scheme Riskometer	Benchmark Riskometer
<p>This product is suitable for investors who are seeking*:</p> <ul style="list-style-type: none"> Capital appreciation over long term Invest predominantly in equity and equity related instruments of companies that are likely to benefit directly or indirectly from the domestic consumption led demand <p>* Investors should consult their financial advisers if in doubt about whether the product is suitable for them.</p>	<p>Scheme Riskometer</p>  <p>The risk of the scheme is very high</p>	<p>Benchmark Riskometer As per AMFI, Tier I Benchmark is Nifty India Consumption (TRI)</p>  <p>The risk of the benchmark is very high</p>
