7
YEARS
CELEBRATION

Another year. Another milestone. Another reason to aim higher.

As we step into our 7th year, we are grateful for every SIP, every investor and every partner who chose to grow with us.

The journey continues.

Registered Name: ITI Mutual Fund, SEBI Registration Number: MF/073/18/01.

Thank you to our Partners and Investors for the unwavering support and continued contributions.

Available on BSE StAR MF, NSE-MFSS, NSE NMF II and MFU platforms.

 1800 266 9603

Equity Market Update

Market Overview

Since March 2026, Indian equity markets witnessed heightened volatility following the escalation of tensions in West Asia. The surge in crude oil prices, a weakening rupee, and sustained foreign portfolio investor (FPI) outflows led to a broad-based correction across markets.

Markets rebounded in April 2026, supported by easing geopolitical concerns and value buying at attractive levels. However, the upside remained capped due to persistently high energy prices and ongoing supply chain challenges.

Market Performance

- BSE Sensex: +6.90% • NSE Nifty: +7.46% • BSE Midcap Index: +13.81% • BSE Smallcap Index: +19.61%

Sectoral Performance

Top Gainers

- BSE Power: +22.25% • BSE Realty: +21.43% • BSE Capital Goods: +20.18%

Top Losers

- BSE Healthcare: +6.79% • BSE Teck: +2.01% • BSE IT: +1.72%

Equity Market Outlook

Market uncertainty is expected to persist due to the lack of a clear resolution to the Middle East conflict, which may keep volatility elevated across asset classes. Ongoing geopolitical risks, coupled with macroeconomic concerns, could continue to influence investor sentiment in the near term.

In this environment, investors are advised to remain disciplined and avoid lump-sum investments, instead opting for a staggered or phased approach to deploying capital. This strategy can help mitigate timing risks and navigate short-term market fluctuations more effectively.

A well-diversified portfolio with a preference for large-cap funds is recommended, as it can provide relative stability and better downside protection while participating in potential market opportunities over the medium to long term.

Past performance may or may not be sustained in future and is not a guarantee of any future returns, and should not be used as a basis of comparison with other investments. Index performance does not signify scheme performance Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Debt Market Update

Consumer price inflation (CPI) climbed to 3.4% year-on-year in March 2026 from 3.21% the prior month, signaling initial impacts from elevated energy expenses, though broader pressures stayed moderate. Owing to stable petrol and diesel prices, the pass-through of higher crude and input costs has been muted so far.

Wholesale inflation (WPI) jumped to 3.88%, a multi-year peak, from 2.13% in February 2025, propelled by costlier crude, gas, metals, and factory outputs; primary articles rose 6.36%, manufactured items 3.39%, and fuel/power 1.05%. Going by trends, input cost pressures may continue to rise over the short term.

Factory output growth (IIP) eased to 4.1% in March 2026, the lowest in five months vis-à-vis 5.1% previously, due to manufacturing slowdowns from costlier inputs and supply chain disruptions; manufacturing dipped to 4.3%, with contractions in nine groups like clothing and electronics. Mining rose to 5.5%, electricity to 0.8%; use-based categories showed capital goods up 14.6%, infrastructure 6.7%, intermediates 3.3%, and durables 5.3%.

Core infrastructure output shrank 0.4% year-on-year in March 2026 after seeing 2.3% expansion in February 2026, hit by energy woes from regional strife. Crude was down 5.7%, coal 4%, power 0.5%, fertilizers 24.6%. Steel was up 2.2%, cement 4%, gas 6.4%. FY26 core sector growth held at 2.6%. Core sector accounts for nearly 40% of IIP and the ongoing contraction is expected to put pressure on the next IIP print.

India's trade deficit tightened to USD20.67bn in March 2026 (USD27.1bn in February 2026), a nine-month low, with exports at USD38.92bn (up from USD36.61bn) and imports at USD59.59bn (down from USD63.71bn); US shipments surged 17.4% to USD8.02bn on tariff relief, but Middle East fell USD3.5bn amid Iran conflict issues. Imports dipped owing to a sharp fall in crude oil and gold purchases.

GST inflows clocked a record Rs 2.43 lakh crore in April 2026 (Rs 2 lakh crore in March 2026), with net GST at Rs 2.11 lakh crore post-refunds, up about 1% from last year, driven by seasonal March inventory shifts. Collections in April tend to be the strongest of the year, as businesses close their financial books at March-end, settling outstanding payables, and clearing inventory— making the monthly uptick a recurring calendar pattern rather than an isolated occurrence.

Debt Market Outlook

Inflation is expected to rise on the back of higher food prices — particularly vegetables and edible oils — alongside elevated transport and services costs driven by geopolitical disruptions.

Crude oil movement and the Middle East situation remain near-term triggers, with markets beginning to price in a tighter RBI stance that could keep yields elevated.

A cautious, short-duration and liquid fund approach is recommended until policy direction becomes clearer; duration funds carry meaningful risk at this stage.

ITI Balanced Advantage Fund

(An open ended dynamic asset allocation fund)

April 2026

CATEGORY OF SCHEME BALANCED ADVANTAGE FUND

INVESTMENT OBJECTIVE

The investment objective of the Scheme is to seek capital appreciation by investing in equity and equity related securities and fixed income instruments. The allocation between equity instruments and fixed income will be managed dynamically so as to provide investors with long term capital appreciation. However, there can be no assurance that the investment objective of the scheme will be realized.

SCHEME DETAILS

Past performance may or may not be sustained in future and is not a guarantee of any future returns, and should not be used as a basis of comparison with other investments. Different Plans i.e. Regular Plan and Direct Plan under the scheme have different expense structure. Benchmark: Nifty 500 Multicap 50:25:25 TRI Additional Benchmark: Nifty 50 TRI. For SIP returns, monthly investment of Rs.10,000 invested on the 1st business day of every month has been considered. CAGR (compound annual growth rate) Returns (%) are computed after accounting for the cash flow by using the XIRR method (investment internal rate of return).

Disclaimer - Fund SIP Performance

The performance details provided herein are of Growth option under Direct and Regular Plans. The Fund(s) offer Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say ₹ 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of respective scheme. The returns are calculated by XIRR approach assuming investment of 10,000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with correct allowance for the time impact of the transactions.

For details of other Schemes managed by Fund Manager please refer to page no. 28 to 34.

Glossary

- **Average Maturity:** Weighted average maturity of the securities in scheme.
- **Macaulay Duration (Duration):** Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero-coupon securities where they are the same.
- **Growth and Cumulative option:** Growth and Cumulative words are used alternatively.
- **Risk ratio data:** There are few stocks which are having abnormal price to earnings multiple, because of the aberration (Covid-19) in the financial results (of the base year). We believe the price to book multiple is a better indicator of the business valuation especially in this kind of abnormal situations. Investors should ideally normalise these valuation multiples to have a better idea of the portfolio.
- **Portfolio Turnover Ratio:** Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given period. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing it by average monthly net assets.
- **Tracking Error:** Tracking error indicates how closely the portfolio return is tracking the benchmark index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio is closely tracking benchmark index and higher tracking error indicates higher deviation of portfolio returns from benchmark index returns.
- **Risk Free Return:** The theoretical rate of return of an investment with safest (zero risk) investment in a country.
- **IDCW - IDCW** stands for 'Income Distribution cum Capital Withdrawal option'. The amounts can be distributed out of investors' capital (Equalization Reserve), which is part of the sale price that represents realized gains, as may be declared by the Trustees at its discretion from time to time (subject to the availability of distributable surplus as calculated in accordance with the Regulations).
- **Portfolio Yield (Yield To Maturity):** Weighted average yield of the securities in a scheme portfolio.
- **Total Expense Ratio (TER):** Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

How to read factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for a SIP that invests Rs. 500 on every 15th of a month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which an investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds. Some typical benchmarks include the NIFTY, Sensex, BSE200, NSE500, Crisil Liquid Fund Index and 10-Year Gsec.

Entry Load: A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged when an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101.

(Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor).

Exit Load: Exit load is charged when an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceeds at net value of NAV less Exit Load. For instance, if the NAV is Rs. 100 and

the exit load is 1%, the investor will receive Rs. 99.

Yield to Maturity (YTM): The Yield to Maturity or the YTM is the rate of return when a bond is held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

Modified Duration Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is termed an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
